4. EASY ASSIST

Would you, or someone you care for find it difficult to turn off your Emergency Control Valve (ECV) in the event of a gas emergency? If you would struggle to hold and turn a traditional ECV handle, the EasyAssist will help you. It is designed to be activated at the push of a button isolating the gas supply while you wait for the Gas Emergency Service to attend. It has an additional safety feature so, in the event of a domestic house fire the EasyAssist will automatically activate and shut off the gas supply.

CALL Brandwood to be referred for this FREE service.
